Background: This article is a review of factors that are involved in outpatient management of asthma, with an emphasis on transitional strategies and patient/parent education. Expert Opinion: Caring for children with asthma is not easy, but its complexity can be managed with proper care from a provider knowledgeable in the needs of children and the strategies for improving self-management of the disease. Q: How to get id from one model in another model in same table in laravel I am new to laravel and working in laravel version 4.2. I want to know how to get id from one model in another model in same table. Model Name: Student Here I have Teacher as a child model and I want to get student id to save into table teacher. I tried like this and it didn't worked for me. \$student\_id = \$this->student->where('class\_id', \$class\_id)->pluck('id'); Model Name: Teacher Here I have student as a parent model and I want to get teacher id to save into table teacher. \$teacher\_id = \$this->student->where('class\_id', \$class\_id)->pluck('id'); The above code show both the id of teacher and student. Is there any other way to do this? A: This is what I use. In Student model create a scope, create, update, etc. In Teacher model add a relationship Class Model / \*\* \* @return \$this \*/ public function students() { return \$this->hasMany(Student::class); } Student Model public function teacher() 82157476af
